It is Extraction's goal to be the safest and most responsible operator in the DJ Basin.

370 17th Street, Suite 5300
Denver, CO 80202

Hello,

We at Extraction Oil & Gas wanted to contact you to let you know that we will be removing and reclaiming a well site in your neighborhood. The location of the wellsite to be removed and reclaimed is outlined on the map on the reverse side of this card. The process to plug this well and begin reclamation is anticipated to begin on or around June 1 and will take approximately two to three weeks to complete. During this time, you may see a slight increase in the number of trucks on nearby roads, however we will avoid operating during commuting hours to ensure that we minimize traffic. Additionally, you will temporarily see a workover rig (also as pictured on the reverse side) on this site, as we permanently seal this well. Once the decommissioning process is complete, this site will be fully reseeded with native grasses and then monitored until the site is revegetated.

If you have any questions, please contact us via our Community Hotline at **720-282-4582** or at info@extractionog.com.

Thank you for your support and patience as this process is safely and efficiently performed.
